

The world

(But hands on back) The earth is round and big.
There are many seas around the world (make big circles).
Sometimes there are big waves (big wave-like movements).
Sometimes there are small waves (small wave-like movements).
Sometimes the sea is calm and still (peaceful strokes from up to down).
There are also meandering rivers around the world (flowing movement with fingers from up to down).
And beautiful, blue lakes (stroke the back).

Trees and forests grow around the world (make shape of trees on back).
As well as many flowers (draw flowers with fingertips).
The sun gives warmth (round movements on back).
and the moon circles the earth (draw big, slow circles with fingertips).

There are many different countries around the world (touch the back all over with your hands).
There are children living in each of these countries.
Children from different countries told and wrote stories (write lines on your finger).
They told stories also with touch (stroke and press back with your hands).
They share the stories with children from other countries (pull your hand to many different directions).

The language of touch is the same in all countries (make big circle on back).
Positive touch is the language from your heart (draw a big heart on back and finally place your hands on back to finish).
